SYNOPSIS OF CONTENTS

The Florida Gazetteer contains one thousand and seventy pages, the contents arranged as follows: The first fifty-one pages are devoted to useful miscellaneous information relating to Florida, embracing a descriptive sketch of the State, showing its location, contour, water course, soil, products, manufactures, commerce, climate, etc., followed by the government officers, the judiciary, state boards, a list of county seats and county officers, county commissioners, a bankers' directory, railroads with express companies operating on same, etc.

Pages fifty-eight to six hundred and sixty-four is an alphabetical list of the cities, towns, villages and settlements in Florida, with a sketch of each place, showing its geographical location, population, distance to different points, most convenient shipping stations and banking points, products that are marketed, churches, schools, libraries and other items of interest. Each of these sketches is followed by the names of all business and professional persons located there, as well as those in business in the surrounding country for which it is the postoffice.

Pages six hundred and sixty-five to one thousand and sixty-nine contain an alphabetical list of classifications of the various trades and professions followed within the State. Every line of trade is represented in these classifications and all the persons doing business in each particular line throughout Florida are arranged in alphabetical order by towns under these classifications, thus bringing the persons engaged in any business or profession together under one heading, separated by towns.

With this issue is presented a map of the State, giving all railroads and their branches, and showing the names of express companies operating on same.

Where does your Advertising go?

When your advertising matter goes out hit or miss to any old sort of a list of names, there's bound to be tremendous waste.

Polk's lists are different—because they are based on original data—the data that goes into Polk's 400 City, County, State and National Directories. Directory publishing is our principal business.

98% delivery is guaranteed on our lists—can you ask for any better proof of efficiency?

Form letters—well executed—command attention. We do addressing, multi-typewriting, filling in, folding, enclosing and mailing.

R. L. POLK & CO.

LETTERS—LISTS—MAILING

Wabash 2478—PHONES—Auto. 54-269

RAND-McNALLY BLDG. CHICAGO

Write for our free "List of Lists"

Do you realize that a City Directory advertisement is a testimonial to the permanency, the stability, of the advertiser?

That's the sort of concern all of us want to patronize, because we know when they sell us merchandise they are behind it in every way, today, tomorrow, and for the years to come.

"Fly-by-night," "fire-sale" and other temporary or *"get-rich-quick"* concerns rarely appear in the City Directory.

And it is a noteworthy fact that the concerns which advertise one year in the city directory are there again next year. 90% of directory advertising is renewed.

Directory advertising, is profitable. In connection with the classified business headings it is doubly effective.

May we explain how and why it will pay you?

The Publishers of this Directory

FLORIDA

Is sometimes called the "Flowery" or "Everglade" State. Its civilization dates further back than that of any other State in the Union. In 1512 it was conquered by the Spaniard, Ponce de Leon, and in 1539 it was visited by De Soto. In 1564 a permanent settlement was made at St. Augustine and at Pensacola in 1596. The Spanish colony was overcome by the British in 1535 and the Territory was under British rule from 1763 to 1783, when it was receded to Spain. In 1819 Spain ceded it to the United States, the cession being ratified the following year. Florida became a Territory in 1822 and a long series of conflicts with the Seminole Indians, known in History as the Seminole War, retarded its prosperity. It became a State in 1845. It is the southernmost State in the Union, extending as a peninsula through five degrees of latitude, with a coast line 472 miles long on the Atlantic coast and 674 miles on the Gulf of Mexico. Its surface, generally level, but sometimes gently undulating, is nowhere over 330 feet above sea level. In the south the "Everglades" until recently formed an extended swamp, morass and jungle; a vast Cypress swamp on the western side and a Mangrove swamp at the lower end of the peninsula still being practically impenetrable. Dense forests still cover the greater portion of the State, but with its development adding to its beauty and charm.

The fossil remains of elephants and mammoths and giant sloths and tigers are found in many parts of the State. In the office of the State Geologist, at Tallahassee—a man whose fame as a student and investigator extends far and wide—can be found a large assortment of the remains of a surprising variety of fossil land and marine forms of life, indicating the existence here of a vast number of strange and grotesque beasts, birds and fishes long before man took a place on the earth and became its master. The alligator is a survivor of past ages, and is as much a curiosity today to Floridians as to tourists.

The Indian mounds, abundant in all parts of the State, bespeak a dense aboriginal population at one time, the only record of their existence being left in rude pottery and bone found in heaps of earth built up for observation, defensive and burial purposes. Scientific societies have explored many of these mounds and found relics of crude devices used by our first inhabitants in war and peace.

There are numerous rivers: the St. Johns, Indiana, Caloosahatchee, Withlacoochee, Suwannee, Apalachicola, Ocklawaha and St. Marys. A number of these rivers flow entirely across the State (the St. Johns River runs almost the entire length, rising far to the south and flowing due north), and in almost every case have at their mouths safe harbor for vessels in coasting trade. There are thousands of lakes, some large enough for small steamers. Lake Okeechobee is the largest in the State, being 40 miles long and 30 miles wide. The State lies between 24½ degrees and 31 degrees

north latitude, and between 80 degrees and 88 degrees west longitude from Greenwich. The total area of the State is 59,268 square miles, or 37,931,520 acres. Of this area according to the latest United States Census, the total land surface is 54,240 square miles; the total area covered by water, composed of lakes, rivers and ponds, is 5,028 square miles. The length of the State from its northern boundary to the south end of the peninsula is something over 400 miles, the average width of the peninsula is about 100 miles and that portion of the State lying along and between the States of Georgia and Alabama and the Gulf of Mexico averages about 60 miles in width, though much narrower in some places.

From its geographical position, being in the same latitude as the northern half of Mexico and southern China, it is natural to suppose the climate is hot, but its comparative degree of heat is not accurately indicated by its latitude, because the temperature that might be expected from its geographical position is controlled in great measure by its peculiar shape, bringing the whole surface in close proximity to the ocean currents which influence to a great degree its entire climatic conditions. The narrowness of the State and its consequent exposure to the fructifying influence of the balmy ocean winds produces a pleasantness and salubrity of climate, and a power of vegetable production truly wonderful.

The principal harbors on the Gulf Coast are Pensacola, Tampa, Charlotte Harbor, Key West and Carrabelle, and on the Atlantic Coast, Fernandina, Jacksonville, Fort Lauderdale, and Miami.

Throughout the history of the world experience has invariably shown those countries blessed with water facilities for travel, transportation and commerce, are the ones that accumulated greatest wealth, were prosperous and progressive. Florida has these facilities to a greater extent than any other State, for practically all of her territory is in close touch with the commerce of the ocean, through her harbors, where her products may be transported to other climes or exchanged for wares from other parts of the world.

Geographically, no equal area on earth is more favorably located with facility of access by water to all continents than Florida. A study of a map of the world, on "Mercator's Projection," will substantiate this statement.

Florida as a front yard of the Union is vitally interested in world problems. No State of the American Republic has a more commanding location with reference to the world. Sir Walter Raleigh long ago said, "the country in command of the sea commands the world." Great Britain is not as well located in accessibility to the world as Florida. To the east, across the Atlantic, are the continents of Europe and Africa, to the south is Cuba, with which there is car ferrage, and just beyond is the continent of South America, while the Panama Canal gives it nearest access to the island continent of Australia to the southwest, and to the northwest is Asia.

Geographically Florida commands more territory tributary in a commercial way than any other American State. All of the West Indies, a thousand or more islands, of which Cuba—larger than Ohio, with Delaware and Rhode Island thrown in, and the continent of South America, with thirteen nations, as the maps show, are nearer to Florida ports than any other. Immediate neighbors to the north are Georgia and Alabama, the great mineral bearing States of the South. Across the Gulf is Mexico, with nearly 800,000 square miles of territory, and below it the five Central American Republics of Guatemala, Honduras, Nicaragua, Costa Rica and

Panama. Across the latter the United States owns a ten mile strip with a canal on which there has been spent $350,000,000. This canal cuts the trip to California 10,000 miles shorter than by Cape Horn.

Any account of Florida would be incomplete that did not include a statement regarding the work of the late Henry M. Flagler, giving him undying fame and his State distinction and renown, in building the extension of the Florida East Coast Railway across the Florida Keys from the mainland to Key West. This is not a long piece of railroad construction, but there were no precedents on which estimates for works of this character could be based. Contractors came down, looked over the wide waste of rolling water to be bridged, shook their gray heads and returned unwilling to even try their skill, or trust their judgment in such unusual undertakings.

The difficulties are these: a narrow fringe, more or less broken, of low coral islands, or keys, jutting out from the mainland to Key West to be connected by embankments, trestles or viaducts and bridges, the Atlantic Ocean on the south, the Gulf of Mexico on the north, protected in places by the outer reef on the south side and by sand bars on the north.

These islands are rocky, hence afford a bed for the railroad for 112 miles, the balance of 66 7/10 miles to be trestled or bridged or filled in. After many months of careful examination by Mr. Flagler's engineers, the actual work began, dredges were put to dig two parallel canals, 100 feet apart, from a point across the Everglades south to Homestead to Jewfish Creek at Key Largo, 14 miles, the dump between the dredges being for the future railroad bed. A number of light draft steamboats and barges were bought and supplies were carried, including water (for no fresh water is found on the keys), to camps scattered along the keys from Jewfish Creek to Key West, and thousands of laborers were put to work grading the roadbed on the Keys. These men were well cared for, food was good, and their health was made an object of care, great dredges were built or bought and put to filling in with clay, sand and rock. Owing to the shallow waters between some of the Keys, trestles were built across these waters and the work of filling in these places that could so be treated was carried on night and day by dredges and by trains of cars, dumping rock and clay along the sides of these trestles. Where the water was too deep for this treatment reinforced concrete viaducts were built, the longest at Long Key, being 2 1/10 miles in length, diameter of arches 50 feet, the track level is 31 feet above sea level. This type has also been used for a number of openings at other points. The Knights Key and Little Duck Key bridge is of steel girder spans, these girders are 80 feet long, 8 feet high, track level same as Long Key viaduct. The girders are supported by reinforced concrete piers.

The total length of bridges is 17.6 miles; the total length of embankment built by dredges is 49.1 miles.

At Knights Key, 111 miles south of Miami, a wharf was built where cement granite, gravel and sand from the Hudson River quarries and Baltimore, and other construction supplies could be landed by seagoing vessels. At Jewfish Creek, Indian Key Channel and Moser Channel, draw bridges were provided.

Recalling, as Mr. Flagler did, the great mistake made by northern railroads, as for instance: The New York Central, Boston & Maine, Baltimore & Ohio and Pennsylvania Railroad in providing insufficient terminal facilities at the great cities, Mr. Flagler planned and built a terminal yard at Key West of about 160 acres of land built entirely in shallow waters on the north side of the island, thus creating terminal facilities largely in excess

of the present wants, but sufficient to supply all future needs. Freight is now carried from these terminals to Havana, Cuba, 80 miles south, in car ferries without breaking bulk.

The most important work facing Florida today is the draining of the Everglades. When completed, an event will have transpired of as much moment as the opening of the Panama Canal was to the world. The work, involving 4,000,000 acres, is progressing satisfactorily. Five great canals have been completed from Lake Okeechobee, through this district, to the Atlantic Ocean, with outlets at Palm Beach, Deerfield, Fort Lauderdale and Miami. The whole cost of this great work will be approximately $6,000,000. The canals referred to not only serve to drain the marshes, but furnish means of transportation by steamer. Exclusive of the Everglades project, with its 4,000,000 acres, there are no less than 1,700,000 other acres, representing 23 separate districts of more than 2,000 acres each. Five of these comprise more than 100,000 acres each, and only four drop below 20,000 acres. The largest is the Withlachoochee district, but when the plans of the Bunnell and St. Johns Park drainage district, in St. Johns and Volusia Counties, of 443,000 acres, are perfected, it will be in leadership in area.

The widespread attention to reclamation matters covers all sections of the State and means the rescue of a vast territory of wet land, as rich as cream when the water is taken off, and prosperous agriculture will follow.

More money is now being spent per capita in Florida to improve the roads than in any other State. Florida, too, is the only Southern State penetrated by all the great national automobile roads: uniting the chief American centers—the Dixie Highway from Chicago and crossing the Lincoln Highway, the Miami-Quebec Highway through New York, Philadelphia, Baltimore and Washington; and the Old Spanish Trail along the Gulf to Texas, and connecting en route with the Jackson Highway, the Santa Fe Trail and with the Apache Trail over the mountains to the Pacific Coast.

The expense is less in Florida than elsewhere to operate automobiles, with less wear, for there are no steep hills to climb. Motoring is destined to become a constant pleasure in Florida in all seasons. The motor, too, is daily widening its use in business. Dirt streets in cities and towns everywhere in the State are giving place to brick or hard-surface highways, the main ones in many instances to connect with other towns. In every line of municipal betterment our Florida communities are setting a pace comparable with development in the older and richer towns and cities of the Eastern and Middle States.

Outdoor life is a delight on quite every one of the 365 days of common years and the 366 days of leap years.

No State has such an extent and variety of navigable waterways, possible of being connected up by canals, and give the State extensive and cheap transportation facilities, on which men with their families can cruise in comfort and safety and at less cost than to maintain homes in the long and expensive winter-land of the North. Available, too, are towns and cities, with splendid churches and schools, and telegraph and telephone facilities, and newspapers of high class, giving worldly happenings, and cultured editorial comments on current events, and yet all about are the "forests primeval," with rare growths and flowers, blooming in every month, and interwoven with groves of fruit and green fields and garden lands, producing delicacies to supply tables of northern consumers when their home country is held in thrall by snow and ice.

In no State is there a more attractive blending of the vegetation of the temperate and sub-tropical zones. The visitor is rarely out of sight of water in lakes and rivers in traveling over the State by rail or automobile. No sky is more radiant with stars, and no nights anywhere are made more charming with the songs of feathered hosts, including the clear and delightful notes of the mocking-bird—heard at all hours.

Florida has an all-the-year-around climate. The winters have little or no sleet, ice, frost, snow, and no protracted cold. Damaging freezes come at intervals of a generation, as time is measured in the life of man.

The summer warmth never prostrates man or animal, the temperature never reaches 100 or more above zero, as is common in the North; sultry nights are unknown, and constant winds from each side of the State bring comfortable uniformity in all seasons. No State has a more efficient health service; yellow fever has been banished, and the causes of malaria and typhoid fever are known, and these will disappear when men observe known and necessary precautions. Fuel and clothing bills are less in Florida than in the colder North.

There is no worthless land in Florida. In the central East Coast region, in pure white sand over which a handkerchief can be passed without discoloring it, are found flourishing pineapple plantations, yielding the finest fruit of its kind in America, of which hundreds of cars are gathered and shipped every year.

Florida has ten national bird reservations—more than in any other State—and the Federal Government recognizes the value of the climate and soils by maintaining four special experiment stations—more than in any other State—to test for American use many of the more than 40,000 plants already introduced from foreign countries and not indigenous to our continent.

Florida has many varieties of soil, millions of acres of it as rich as cream. Poor soil can be made fertile, and the fertility of rich soil can be maintained by proper methods. Florida has in its legumes the means of keeping up fertility. A ton of green forage plowed under is claimed to equal half a ton of commercial fertilizer for enriching the soil. Plants are largely composed of water, and there is plenty of that element. They need warmth, and that is existent without severe extremes. Science is telling us how to add the few mineral elements needed to perfect the structure of the plant. When intensive and scientific methods are applied to farming in Florida it will be able to support 25,000,000 people in comfort, and not have a greater density than in the north of Europe countries.

Florida can produce as fine beef, mutton and pork at as little cost per pound as in any State of the Union. Eliminate the cattle tick, as can be done, and control hog cholera, and the State will take as high place in the production of meat as it does in oranges. The pastures can be made as prolific and nutritious as anywhere. Chickens, turkeys, geese and ducks—birds of splendid plumage—thrive and multiply under proper care. The once plentiful existence of wild feathered life is evidence that tame varieties can be made a profitable source of income. Wild turkeys of large size—as also deer and bear—are still to be found in the forests of Florida.

Florida produces the finest oranges and grapefruit in America and a grove of trees filled with golden fruit at Christmas is a vision for those who come from colder and less favored sections of the country. In the south half of the State bananas are grown, and cocoanuts, lemons, limes, sugar apples, mangroves, persimmons, guavas, and the delicious avacado

(alligator) pear, all of commercial importance, besides many other rare tropical products. The fig and pomegranate, two of the earth's best known fruits, and mentioned more often in the Bible than any other, are right at home all over Florida.

The waters of Florida, both fresh and salt, afford unlimited facilities for fishing, with choice of still water in the lakes, of running waters in the rivers, and more exciting sport at sea, and the fish caught are worth while, as they furnish a livelihood for thousands of fishermen and food for thousands more. Here, too, are the only American sponge fisheries. Nowhere is the tarpon, the king of game fishes, more abundant, and the event of a sportsman's life is to catch one. And with fishing can be had boating and sailing, with the finest surf bathing in all seasons. In the winter when northern waters are covered with thick ice, bathers can swim in comfort in the Atlantic Ocean and Gulf waters of Florida. And along the coasts are the largest and best sea beaches in the world—wide, solid and smooth as a floor, on which automobile speeding has become a favorite pastime. The artesian water basin, too, somewhat scattered, is one of the most important in the Union and water in some instances is forced fifty feet above the surface.

Florida leads the Union in the productions of phosphates, fuller's earth and naval stores, and ships carry lumber from its mills to foreign lands, and cars distribute it throughout the North. Its cigars are smoked in every community.

Florida has the greatest variety of trees of commercial value—more than two hundred kinds—one-half more than in any other State. There are trees here not known to botanists anywhere else on earth. The abundance and variety of temperate and sub-tropical vegetation in the form of trees, shrubs, vines, plants, flowers, grasses and mosses, is a surprise to all comers. In no State is there a finer showing of flowering trees and shrubs, every month furnishing its kind and color, from tiny beauties struggling for a place in the sun to the marvelous magnolia flower spreading fragrance on the winds. The orchid—the rare and expensive beauty of the northern greenhouse—grows wild in the forests of Florida. Even the rivers insist on helping to mantle their surfaces with green and bloom, as witness the hyacinth and lettuce plant in the St. Johns and other rivers.

With twelve months of growing weather, ample rainfall, and temperature never frigid nor tropical, Florida is like the sack given by Joseph to Benjamin, the last handed to his brethren, as it contained the best. Western lands are all taken, and Florida the last and best of all States, now offers its advantages to the industrious millions of the earth anxious to make homes under favoring skies.

The fruits of Florida represent varieties from all parts of the earth. They may be divided into three classes:

1. Temperate and warm-temperate: Apples, peaches, pears, apricots, quinces, nectarines, figs, plums, Japanese persimmons, strawberries, dewberries, blackberries, mulberries, etc.

2. Semi-tropical: Oranges, grapefruit or pomelo, lemons, tangerines, limes, pomegranates, loquats, guavas, roselle or tree cranberry, etc.

3. Tropical: Bananas, pineapples, cocoanuts, avocados or alligator pears, sugar apple, sapodilla, tamarind, cocoa plum, Barbadoes cherry, rose apple, sea grape, star apple, surinam cherry, pepau (papaya), etc.

The growing of nuts, especially pecans, and the Japanese varieties of walnuts and chestnuts, give promise of becoming important industries. The

largest pecan grove, 72,000 trees, is located near Tallahassee. Hardy varieties of tropical fruits are found in the south or semi-tropical parts of the State, and warm-temperate sections of the north grow varieties of the semi-tropical. No one industry presents more marked development or offers greater inducements than that of fruit raising in Florida. There is a wide range—from strawberries to garden truck, to melons and cantaloupes, to oranges and peaches. Not only in raising fruits, but in material to make barrels, boxes, crates and baskets to ship products in, Florida excels. Fruit growing in Florida for northern markets was scarcely known a generation ago, but now there is an unbroken season beginning in January with strawberries and ending in December with oranges, and the time is coming when oranges will be shipped in every month.

The choice fruits of the present are products of the human intellect as truly as watches or maps. It was to the thought and care of fruit culturists of the past and modern times that renders it possible for the poorest people of today to have fruits that kings could not buy a century ago. And each succeeding year improvements are being made, and the mild climate of Florida offers opportunities in this direction not equaled elsewhere in the Union.

The fruit and truck interests of Florida are in their infancy. The people of this State, much less those of the North, do not realize the wonderful possibilities of Florida, in this and other respects, where everything common to the Union will grow and flourish.

Among reasons why Florida is adapted to successful live stock growing of all kinds, almost without limit, is its vast and unfailing water supply, which is as essential to successful stock growing as are its green pastures. Another equally important condition is the short period necessary for feeding and sheltering of stock as compared with other States. Another of equal, if not of greater importance, is the adaptability and capacity of soils to the production of nearly all kinds of grains, grass and forage crops at as small, if not less, cost than other sections. In all of this the equable climate of the State has much to do, of course, but it is because of these advantages and conditions that Florida should and can compete with any and excel most of the States as a live stock producing country. There are no long cold spells to test the vitality of animals. And Florida still has a vast area of cheap lands.

The number of live stock of all kinds in the State is, in round numbers, estimated at 2,000,000, having a value of about $25,000,000. Instead of this small number, there should be not less than 20,000,000 head, and 10,000,000 should be cattle; the State can maintain such a number.

Government of the State of Florida

CAPITAL, TALLAHASSEE

EXECUTIVE DEPARTMENT

Governor—Sidney J Catts
Secretary of State—H Clay Crawford
Attorney General Thomas F West
Treasurer—J C Luning
Comptroller—Ernest Amos
Auditor—R A Gray
Commissioner of Agriculture—W A McRae

BOARDS OF COUNTY COMMISSIONERS

Alachua: Gainesville—Joseph T Price, Thad C Bryant, Walter E Bryant, Richard B Hodgson, Benj F Carlton

Baker: Macclenny—N A Pellum, chairman, John Burnett, B F Finley, F B Crews, J E Burnsed

Bay: Panama City—J M Barrow, chairman, B A Rhodes, John McLaughlin, J B McCall, A F Driskell

Bradford: Starke—J J Blackwelder, R J Andrews, S T Dowling, J L Underhill, Horace D May

Brevard: Titusville—B C Edwards, S A Osteen, Hiram Platt, John A McNeill, P L Kysor

Broward: Fort Lauderdale—Wm Blackwell, George L Blount, J J Joyce, A B Lowe, C E Ingalls

Calhoun: Blountstown—P F Halley, chairman, H C Richards, J F Freeman, Joseph Tucker, S F Van Horn

Citrus: Inverness—D J Turner, W A Sparkman, John W Davis, Floyd J Rooks, J K Kelley

Clay: Green Cove Springs—W H Blitch, chairman, H R Wilford, Elam Glisson, B M Frisbee, B J Moody

Columbia: Lake City—S S Keen, C C Williams, John M Sikes, Henry Dicks, J O Greene

Dade: Miami—Beverly Peacock, E D V Burr, Julius Smith, Preston H Lee, W J Tweedell

De Soto: Arcadia—L W Whitehurst, Julius W Bullock, W M Whitton, W G Welles, D L Skipper

Duval: Jacksonville—W H Eubanks, S A Mowshall, Orison J Pickett, L L Meggs, David C Brown

Escambia: Pensacola—J George White, chairman, Gus A Soderlind, H E Gandy, L W Hardy, J D McCurdy

Flagler: Bunnell—George Moody, chairman, N E Roberts, H A Eisenbach, Z W Richardson, Z G Holland

Franklin: Apalachocola—T E Marsh, chairman, S J Johnson, E G Edwards, Wm Sawyer, A J Zingarelli

Gadsden: Quincy—S V Hough, chairman, M L Hinson, J H Sylvester, E L Suber, M H Luten

Hamilton: Jasper—R W Taylor, chairman, G C Hutcherson, J W Hunter, M A Tyre, B B Hill

Hernando: Brooksville—J H Kilpatrick, C L Lowman, E N Rewis, Stephen A Wilson, I G Harville

Hillsborough: Tampa—J G Yeates, chairman, T P Lightfoot, M H Mabry Jr, C H Taylor, W B Moody

Holmes: Bonifay—W P Brownell, J A Simmons, J B Deshago, A E Williams, J R Leavins

Jackson: Marianna—W W Wester, chairman, L B Pooser, G R Davis, W W Gay, C G Grant

Jefferson: Monticello—J E Lightsay, R M Gilbert, C W Henry, C A Sloan, E H Groom

Lafayette: Mayo—E B Curry, chairman, F P Parker, P L Suggs, C A Howell, W E Stewart

Lake: Tavares—Arthur B Lees, L K Merritt, J M Lowry, M V Simpson, J C Hathcock

Lee: Fort Myers—R G Collier, W H Towles, W E Phillips, E E Goodro, W S Turner

Leon: Tallahassee—Richard G Johnson, chairman, L S Crump, Miles H Johnson, C M Ausley, M Russell

Levy: Broson—J S Fisher, chairman, M M Clyatt, Y H Kirchhain, T L Williams, Amond Ward

Liberty: Bristol—Grover C Phillips, James R Shuler, W F Hathcock, D M Johnson, J J Evans

Madison: Madison—M A Williams, J J Dale, J P Taylor, N W Campbell, B C Webb

Manatee: Bradentown—W P Frier, D M Courtney, W I Kirkhuff, M G Rushton, J W Ponder

Marion: Ocala—W D Carn, J G Baskin, Joseph W Davis, Norman A Fort, W Luffman

Monroe: Key West—J R Curry Jr, chairman, W R Porter, B D Warren, W D Cash Jr, W H Curry

Nassau: Fernandina—W J Lohman, chairman, O K Sanders, G W Gowen, C C Jones, J H Sauls

Okaloosa: Crestview—J W Baggett Jr, chairman, J H Givens, W J Davis, R A Rozier, B P Edge

Okeechobee: Okeechobee—D E Austin, chairman, R E McLaughlin, W W Potter, R Upthegrove, A Thompson

Orange: Orlando—M O Overstreet, A C Starbird, J L Dillard, C J Sweet, E L Brown

Osceola: Kissimmee—Ernest Mach, chairman, E L D Overstreet, J K Hilliard, A F Bass, B H Guy

Palm Beach: West Palm Beach—Charles W McPherson, F C Aicher, L T Lockwood, Harry Benson, L W Smith Jr

Pasco: Dade City—D H McCarthy, chairman, C A Lock, T N Milton, A J Bissett, J T Pittman

Pinellas: Clearwater—John S Taylor, chairman, E H Beckett, B C Bass, George Edwards, G W Stahl

Polk: Barton—J E Lancaster, J C Durrance, A T Mann, John S Howard, J C Swindel

Putnam: Palatka—W C Alvers, Charles E Rowton, G A Turner, W R Revels, W H Worley

St Johns: St Augustine—Sylvanus Roberts, H E Mahr, I I Moody, W D Andreu, A H Favor

St Lucie: Fort Pierce—C H Edwards, chairman, R E Mudge, E F Ulrich, J J Pitchford, Silas Long

Santa Rosa: Milton—J E Keen, J F Poore, J P Diamond, J D Johnson, W J Wells

Seminole: Sanford—L A Brumley, L P Hagan, C W Entzminger, Q P Swope, E H Kilbee

Sumter: Bushnell—J T Williams, chairman, Thomas Beville, W D Jarrell, A C Hooks, S S Watkins

Suwanne: Live Oak—J W Kite, H A Thompson, G W Brannon, S S Mabley, W D Mercer

Taylor: Perry—J N Deal, chairman, A B Stripling, J E Van, George Kelly, R L Williams

Volusia: De Land—C F Burgman, chairman, W Z Haymans, C O Codrington, D J McBride, L B Bouchelle

Wakulla: Crawfordville—J C Oliver, Emmett C Ferrell, J R Vause, J W Posey, J E Houston

Walton: De Funiak Springs—G M Bishop, A W McCullough, D J Adkinson, E L Schultis, J J Ward

Washington: Vernon—L L Pratt, A D Campbell, C S Mercer, K P Sessoms, T L Davis

CAUTION

Pay no money in advance to itinerant Directory Canvassers. We are led to mention this from the fact that certain parties have been fraudulently using our publications as specimens, and by that means collecting money in advance. Before signing an order, see that it has the name of R. L. POLK & CO. printed thereon. We ask no payment until the work is delivered, and our solicitors have strict orders not to take payment for either advertisements or subscriptions.

R. L. POLK & CO.

Secretary's Office, Endicott Bldg., St. Paul, Minn.

The Association of the American Directory Publishers is composed of reputable City Directory Publishers, organized for the general advancement of the Directory business. Any person, corporation or firm engaged in business as owner and publisher of a City Directory in the United States or Canada, who shall qualify as competent to gather information and compile a City Directory and furnish satisfactory references, is eligible to membership.

The objects of the Association are:

First. The advancement of the Directory business and the improvement of Directories by the interchange of ideas and the exchange of experienced employes.

Second. To provide protection to the public against fraudulent advertising schemes which operate under the name of Directories, and to drive unprincipled promoters of the same out of business.

Third. To provide permanent and profitable employment to competent, industrious and honest Directory canvassers and compilers.

Fourth. For the mutual protection and advancement of the established and prospective interests of all who may become members, by personal advice and assistance of members as may be mutually satisfactory, desirable or advisable, and by such other means as may, from time to time, be shown to be wise, proper and lawful.

$100.00 REWARD will be paid by the Association for the arrest and conviction of any person or persons engaged in publishing, collecting or canvassing for any fraudulent or fake Directory.

APALACHICOLA

Population 4000. The judicial seat of Franklin county, is located on Apalachicola Bay at the mouth of Apalachicola river and on the Apalachicola Northern Railroad, 79 miles southwest of Tallahassee. It is lighted by electricity, has 2 banks, waterworks and sewers, churches of the leading religious denominations, excellent schools, a weekly newspaper, The Times. Has steamers from Carrabelle, daily; from Pensacola, Mobile and New Orleans, weekly, and from points on the Chattahoochee, Flint and Apalachicola rivers, tri-weekly. Is a port of entry for ships with large quantities of lumber, oysters, fish and shrimp. Apalachicola now has four shrimp factories for canning and is the largest exporter of shrimp in Florida. A new saw mill and box factory has recently been established and other saw mills that have been closed down will start up immediately. Franklin county has just secured the services of a government farm agent for the purpose of teaching farmers how to farm, and considerable development is expected along these lines. This county is one of the largest producers of stock in the state, and the free ranges offer splendid inducements along these lines. The raising of hogs has been energetically started and will develop considerably. Saw palmetto berries and acorns grow in abundance. Tel., W. U. Telephone connection. Exp., Sou. Crawford I. Henry, postmaster.

ARCADIA

Population 5000. The county seat of DeSoto county, the heart of the orange and grape fruit section, is a thriving city located 200 miles southwest of Jacksonville, and 70 miles southeast of Tampa, on the eastern bank of Peace River. It is 61 feet above tide water, which is only 10 miles distant. It is the junction point of three railroads, viz., the Atlantic Coast Line, Charlotte Harbor and Northern and East and West Coast Railroads, and hence it has adequate transportation facilities. The growth of the city is natural, due to the natural development of the region, $300,000 will be expended in 1917 in public improvement. The city is justly proud of its school advantages, public sentiment calling for the best in educational matters. The principal religious denominations have churches here, there being 8 organized white churches. The most important industry is the growing of citrus fruits and live stock. There are 2 banks, a daily and 3 weekly newspapers, an electric light and ice plant. Tel., W. U. and Postal. Telephone, Scott. Exp., Sou. Wm. M. Platt, postmaster.

HICKS ELDO, Saw Mill and Postmaster

BARTOW

Population, 4,500. Is the most centrally located town in Polk county, of which it is the county seat. At an elevation of 116 feet above sea level, it stands at the western edge of a narrow stretch of land known as the "backbone" of the state, distant 50 miles from the Gulf of Mexico and from the Atlantic Ocean. It is an important railroad center, being served by the Atlantic Coast Line and Seaboard Air Line railroads. The trains which handle the passenger and express now enter the Union Station recently built. $200,000 is being expended for concrete and asphalt paving, a new city hall has been built at a cost of $17,500. The electric light and water systems represent an investment of $126,000. Water is pumped from an artesian well 726 feet deep, thus assuring pure water. The public library has over 14,000 volumes. The new Court House, one of the finest in the state, cost $100,000, and a modern jail cost $70,000. The Methodist, Baptist, Presbyterian, Episcopalian, Christian, Adventist and Roman Caholic denominations have substantial structures. Ice, cigar, wagon and concrete factories, the largest laundry in interior Florida, citrus fruit and vegetable packing houses, planing and shingle mills, novelty works, 2 bakeries and 2 bottling works are some of the most important industries within the city. Two weekly newspapers are published and there are 3 banks. Tel., W. U. and Postal. Telephone, Peninsular. Exp., Sou. S. M. Wilson, postmaster.

Daytona Educational and Industrial Training School for Negro Girls (Inc.)

Mary McLeod Bethune, Founder and Principal.

COURSES

Academic through four year High School, Industrial and Vocational.
A well equipped Hospital for patients and for training of nurses.
Community demonstration farm for agricultural training.

OBJECT

The school stands for broad, thorough and practical training. Its purpose is to train students to become strong, useful, Christian women, to afford an opportunity to learn a vocation that they may be self-supporting; and by precept and example help to improve the communities in which they live.

A sound body, a trained mind, hand and heart is our idea of a complete education.

DE FUNIAK SPRINGS

Population, 9,000. The judicial seat of Walton county, is an incorporated town, 80 miles east of Pensacola on the P. & A. division of the L. & N. R. R., and the center of a system of good graded clay-sand roads leading in practically every direction. It is the educational center of this portion of the state, having a $30,000 graded high school, Palmer College, Thomas Industrial Institute and the Florida Chautauqua, for which there is a commodious auditorium. The moral tone of the town is excellent, the churches of many denominations being represented. The climate is pleasant at all seasons, due to high elevation and proximity to the Gulf. The people are noted for their progressiveness, culture and hospitality. There are 2 banks with deposits close to $200,000, 2 newspapers, The Breeze and Herald, several hotels, electric light and power plant, including ice manufacture, a saw and planing mill. Tel., W. U. DE LAND

Population, 4,000 Is an incorporated city and the seat of justice for Volusia county and is located 3½ miles west of the St. John's river, and on the A. C. L. Ry., 108 miles south of Jacksonville. Has water works, an electric light and power plant and ice manufacture, 2 banks, 2 newspapers, The News, daily and weekly and The Record, weekly, a new $60,000 high school building, several hotels, a theatre, a library and a sanitarium. The John B. Stetson University is located here. There is an 18-hole golf course open to all visitors. The city is justly proud of its public buildings and beautiful homes. The Commercial Club has just completed a building for its use at a cost of $20,000. The county has an excellent system of good roads constructed of cement granitoid brick at a cost of $1,500,000. Fruit raising is one of the chief industries. The moral tone of the community is high, churches of the leading religious denominations being represented. Tel., W. U. Telephone connection. Exp., Sou. E. L. Rowe, postmaster.

EUSTIS

Lake county was formed by an act of the legislature of the State of Florida in the year 1887, from portions of Sumter and Orange counties. It contains thirty-one townships, embracing an area of over eleven hundred square miles, its greatest length being sixty miles, an average width of about eighteen miles. About one-sixth of its surface is covered with beautiful clear lakes of fresh water from which the county takes its name. That particular district of Peninsular Florida, so long and so favorably known as the Lake Region, is now principally embraced in Lake county. Nature has here in her best style fitted a magnificent semi-tropical region with ample space for a million people. The altitude of this district, midway between the Atlantic and the Gulf, affords its people constant, pure sea breezes with slight extremes of heat and cold. There is a ridge known as the "Florida Backbone," which begins at the Georgia line, runs through the center of the State of Florida, and ends less than 200 miles south of Jacksonville. All of the land more than 100 feet high on the peninsula is on this ridge. Eustis is on the southern extremity of it, and is the highest important tourist resort in Florida. Eus-

tis is surrounded by hills covered with pine forests and hollows filled with innumerable clear-water lakes. Eustis is located on the east shore of Lake Eustis, and is connected with Lake Harris, on the west shore by Dead River, with Lake Dora on south shore by a canal, Lake Griffin, Silver Springs and the St. John's by the Ocklawaha on the north shore. The lakes in this chain are among the largest in the State. To the lover of rod and reel these lakes and their tributary streams form a fisherman's paradise. The smaller lakes contiguous to Eustis abound in bass, bream, pickerel, perch and other fish. There is plenty of game in the lake regions and highlands of Lake county—quail, squirrel, wild turkey, deer and bear. The Eustis hotels are the New Ocklawaha, the Grand View, the Florida Home and the Sunnyside. The New Ocklawaha is one of the most popular tourist hotels in the state, opens January 1st, closes April 1st. It was established by the late John S. Lane, of Meridan, Conn., is situated at the highest point in Eustis, commanding a fine view of Lake Eustis and the surrounding orange groves. The hotel is now owned by the Lane Realty Co. and is under the management of W. R. Smith, of Meridan, Conn., connected with the hotel is one of the most popular golf courses in the state. Lake county during the past two years, has spent one-half million dollars on the building of good roads connecting with highways between the east and west coasts, and the Dixie Highway passing through the city. The developing of Eustis from a small country hamlet to the enviable position in which it ranks as the leading tourist city in the interior of the state; the erection of so many handsome winter homes, the miles of cement sidewalks and paved streets that have been laid, the construction of waterworks, sewage system, electric, lighting plant, ice manufacturing and other improvements make the city not only desirable as a winter resort, but as an all-year residence, is largely the result of the opening of the Ocklawaha hotel. The facilities for motor boating on Lake Eustis and Harris can not be surpassed in any other section in the state. There are over one hundred boats on these lakes, comprising launches, cruising and racing boats. The latter class are boats making the highest rates of speed in the state. Eustis has an active Board of Trade, banking facilities provided by the Citizens Bank, one of a chain of banks in the state, and the First State Bank of Eustis. The Eustis Lake Region is one of the leading newspapers in central Florida. Tel., W. U. Telephone connection. Exp., Sou. George J. Dykes, postmaster.

FORT LAUDERDALE

Population, 4000, the judicial seat of Broward county, "The Gateway to the Everglades," is an incorporated city in Dade county, and is 341 miles south of Jacksonville, and 63 miles by canal, southeast of Lake Okeechobee, on the banks of New river, and one the Dixie Highway between the famous resorts, Palm Beach and Miami. Here Nature has contrived to unite conditions of soil and climate in a manner most delightful, while the health-giving breezes from the broad Atlantic fan the Florida tropics to an evenness of temperature throughout the year, which is a source of wonder to the visitor from the North. Couple this advantage in soil and climate with the vast acreage of groves —pineapples and vegetables being planted yearly, with the fact that Fort Lauderdale, being situated on the deepest navigable river in south Florida, with two of the main canals from Lake Okeechobee terminating at this point, and bringing to the city the products of the vast territory for shipment to the markets of the North, and it will at once be apparent why Fort Lauderdale, from a village of less than 200 souls in 1911, has sprung, in so short a time, to a business center of about 4000 inhabitants.

The Everglades are Fort Lauderdale's back yard, and comprise over three million acres of the richest garden and farm lands in the world, which truly constitutes the "American Tropics."

Upon them crops grow every day in the year, more luxuriantly than in the valley of the Nile—like in a Northern hothouse, and in greater abundance than any one who has not seen it will believe.

The assurance that the Everglades will be drained is attested by the hundreds of truckers ,who are already prospering there, and by the report of the Everglades Engineering Commission, which consists of three world-famous drainage engineers, who, after eight months of careful investigation in the report say: "The everglade drainage is most feasible at a cost of $3.50 per acre."

Five-sixths of all this wonderfully rich farm and truck land is accessible through Fort Lauderdale by means of its two main drainage channels, which serve also as transportation canals, and via New river, pass through Fort Lauderdale, as a gateway to the Atlantic Ocean.

These canals also form the only waterway across Florida from the Atlantic Ocean ,through the Everglades, Lake Okeechobee and Caloosahatchee river to the Gulf of Mexico, through which regular lines of boats, carrying United States mails, are now passing.

Located here are the main offices and headquarters of the biggest reclamation projects in the world, necessitating the greatest engineering ingenuity since the completion of the Panama canal, the drainage of the Everglades.

Seeds | CRENSHAW BROS. SEED CO. TAMPA, FLORIDA 1507 Franklin Street *Write for Complete Catalogue.* | POULTRY AND BEE SUPPLIES

The attractiveness of Fort Lauderdale is not to the homeseeker alone, for to the tourist, the lure of both field and stream hold forth their attractions. Fish and game abound in this vicinity. Streams, rivers, lakes and the bosom of the Atlantic yield their tribute to the skillful wielder of the rod and reel. Commercial, several companies are shipping carloads of fish daily to the markets of the North and West.

Dozens of varieties of salt and fresh water fish, including the snapper, Spanish mackeral, baracuda, pompano, blue fish, mullet, several kinds of bass, tarpon, trout, catfish, flounder, porgie and king fish are in the markets daily, and the industry in the aggregate gives employment to about three hundred and fifty men, while about seventy power boats, in addition to numerous skiffs and rowboats, are kept busy transporting the fishermen and their catch.

Oysters and clams are found in abundance in the inlets and sounds along the coast, and just recently considerable interest has been aroused in the cultivation of oysters, which promises to become an important industry.

All the citrus and tropical fruits grown along the East Coast do well here, with the grapefruit, orange, avocado and pineapple easily taking the lead, while the almost inexhaustible variety of other fruits makes it possible to have fresh fruit in the markets every day in the year, and this is also true of the various garden vegetables. In the muck lands of the Everglades and the river bottom, bananas of the best quality are grown with little or no fertilizer, and their cultivation is each year becoming a much more important feature of the fruit-growing industry.

The banking facilities of Fort Lauderdale are amply provided for by the Fort Lauderdale State Bank and the Dade County Bank, both strong financial institutions. The rapid growth of these banks, in the few years since their organization, attest the progress of the city and surrounding country and show the faith of the financiers. Where capital leads, it is safe for others to follow.

Fort Lauderdale schools have outgrown the facilities of the recently enlarged stone structure, and work will soon begin on a magnificent new building, equipped with all the latest educational features to meet the requirements of an accredited high school, all the teachers of that department holding college degrees. The primary, intermediate and grammar grades are equally well equipped. A new schoolhouse is being constructed at a cost of $45,000.

The religious organizations located here are the Methodist Episcopal, Methodist Church South, Presbyterian, Baptist, Christian, Episcopalian, Catholic, Christian Science and German Lutheran.

The city boasts a public library, 2 newspapers, the Herald and Sentinel, a theatre, miles of macadamized streets, and cement sidewalks, an electric light, ice and water plant, fine mercantile establishments, and an auto stage line to Miami and West Palm Beach. A beautiful boulevard extends to Ocean Beach, where bathing is enjoyed daily throughout the year.

Motor boating, on the many rivers, lakes and canals, connected with the fishing, furnishes recreation to thousands, and the matchless paved roads, extending over hundreds of miles in this county, makes automobiling delightful every day in the year.

The Fort Lauderdale Board of Trade is a live organization, carefully fostering the interests of the city and advancing its fortunes with enthusiasm.

GAINESVILLE

Population, 8,000. The judicial seat of Alachua county, is an enterprising and prosperous city located on the S. A. L., A. C. L. and T. & J. Railroads, 28 miles from Fairfield, 40 from Ocala, 177 from Tampa and 70 southwest from Jacksonville. The city is lighted by gas and electricity, has good water and sewerage systems, fire and police departments, exceptional educational advantages. The University of Florida is located here. There are high and grammar schools and excellent private and business schools, 4 strong banks, a newspaper, The Sun, published daily and weekly, a hospital and library. Churches of leading religious denominations are represented. Leading industries are an ice plant, planing mill, foundry, grist mill, etc. The city is popular as a health resort. It is located in the phosphate belt and surrounded by a productive agricultural district. Tel., W. U. Exp., Sou. James F. McKinstry, postmaster.

JACKSONVILLE

Population 103,120 (including suburbs). The largest and most important city in Florida, is located on the St. John's river, about 18 miles from the Atlantic ocean, and has direct ocean steamship communication with Boston, New York, Philadelphia and Baltimore. It has a water front of seven and two-tenths miles, is further west than any other Atlantic port and is nearer than any port north of Charleston to St. Louis and the Northwest. Its railroad facilities are equally good, the following lines centering here and affording easy connections with every portion of the country. The A. C. L., the F. E. C., the G. S. & F., the S. A. L. and the Southern.

There is probably no city in the United States that offers so many attractions as a place of residence as does Jacksonville. It is located on the banks of the St. Johns river, which extends almost the entire length of the state, and which affords ample opportunities to sportsmen, yachtsmen and fishermen to indulged in their favorite pastimes. It is within 40 minutes by rail of the Atlantic ocean and one of the finest seaside resorts in America. Standing upon high ground and well drained by creeks that flow through it and by the great river sweeping round it, the city enjoys advantages of fortunate sanitary topography, and its natural healthiness has been improved by perfect drainage, sewerage and other necessary sanitation. It has a splendid supply of almost chemically pure water, obtained from artesian wells, which are sunk to the depth of about 1,000 feet. The climatic conditions are as near perfect as can be found in America. It is not only a very attractive winter resort, but even the summers are not as uncomfortable as in most northern cities, for it is fanned by delightful breezes from the Atlantic ocean. The population is cosmopolitan—probably as much so as any city of its size in the Union—and strangers who come here to make this their home always find a generous and hearty welcome. The school advantages are excellent, and are being constantly improved. There are churches of all denominations, a public library and the very best amusements are afforded the people of the city. It has gas and electric light plants, waterworks, and efficient fire department and a fire-alarm telegraph and the largest and most influential Board of Trade in the South. Trolley lines run through all parts of the city and into the suburbs and there are a number of fine parks and pleasure resorts. There are miles of paved streets and beautiful shell drives. The mortality reports show that Jacksonville is one of the healthiest cities in this country. The climate is particularly beneficial to all complaints originating in or from the severity of a northern latitude; the mean temperature is seventy degrees and it is cooler in summer than either Boston, New York or Chicago. The air is soft, balmy and exceedingly beneficial to all pulmonary complaints. It may be imagined

Suite 302 Professional Building JACKSONVILLE, FLA.

that because Jacksonville is in the extreme south that it is an isolated city, but with nine railroads extending to all portions of the country, and elegant Clyde steamships running 5 steamers a week to New York and Boston, the Merchants & Miners Transportation Co runs 3 steamers a week to Baltimore, and not only telegraphic communication with all parts of the world but with long distance telephone, it is in touch with all the great business centers of the country. The shipping interests constitute a large percentage of Jacksonville's progressiveness. The imports consist principally of flour, sugar, bacon, coal oil, shoes, fertilizers, steel rails, grain, etc. The exports are lumber, cross ties, shingles, naval stores, fruits, vegetables, kaolin clay, cotton, etc. The city has 8 banks with a combined capital and surplus of $3,958,000, and very much of the growth and progress of Jacksonville has been due to these institutions, which have an established reputation for strength and stability. They have been the agencies that have gathered and stored the funds of its citizens to be loaned out to carry along and develop the city's manufacturing and business interests and to provide its thrifty people with homes. The press is represented by the Florida Times-Union and the Metropolis issued daily, the Commercial News, Dixie, Free Press, Herald, Republican, Florida Staats Zeitung and the Floridian issued weekly, and the Fraternal Record, issued monthly. The permanent prosperity of Jacksonville and its growing importance and wealth is assured by the constantly increasing development, prosperity and importance of a state that has resources for wealth far in advance of almost any other section in the country and has but just begun, so to speak, to properly develop them. The city has over 300 factories, great and small, has ten great saw and planing mills, a floating dock of 4,200 tons capacity, 2 large ship yards and wholesale and retail houses in every line of merchandise. Aside from these, others are coming and every branch of business and every industry is on a steady and reliable increase. Probably no city in the South has a more brilliant future before it or a more stable foundation for its prosperity than Jacksonville, for extensive travel through the entire state shows the enormous room for increased development and the present rapid improvement that is going on everywhere, while every dollars worth of business sent out of the state or brought into it is bound to make its impression on Jacksonville business. Enormous hotels and several of them are required to accommodate the many thousands who each winter visit this great resort of the state, and boarding houses, apartment houses, all small hotels and even private families receive their full share of the guests who yearly make this city one of the most noted transient residence resorts in the world. Tel., Postal and W. U. Exp., Southern. P. A. Dignan, postmaster.

SHANNON America's Best REFRIGERATOR

FOR BUTCHER, GROCER, HOTEL, CAFE

—we do no vacation in the winter time. It is built for all-year-round service. The invisible construction, latest improved cushioned gasket compression doors, heavy tempered steel hinges and locks, positive insulation of compartments, removable wire shelves—are among the features which gave "Shannon" a National Reputation.

We offer the most liberal contract, make prompt shipments and insure lowest delivery price to you.

Our direct supervision of construction guarantees the greatest values for your money.

KEY WEST

Population 20,000. A prosperous and enterprising city, the judicial seat of Monroe county, is located on Thompson's Island, or Bone Key, a small, low-lying coral island south of Florida mainland, 60 miles southwest of Cape Sable and commanding the entrance to the Florida Passage and the Gulf of Mexico. The city is a port of entry and military station of the United States, is garrisoned by the coast artillery, has a safe and accessible harbor defended by a fort. It has extensive docks, repair yards, marine railway, etc. Its mild climate has made it a popular health and winter resort. It is the terminus of the famous F. & E. S. Ry., built across the Florida Keys and shallows from the mainland in 1912. Cigars are very largely manufactured, which are famous the world over and there are important industries in sponges, coral and turtle shell and in deep sea fishing. The city has modern civic improvements, electric light, ice and water plants, sewage system, a strong bank, 4 hotels, a hospital, public library, 2 daily newspapers, Citizen and Morning Journal and Florida, weekly, a convent and boys' college, churches of the leading denominations, etc. Tel., W. U. Telephone connection. Exp., Sou. Marcy B. Darnell, postmaster.

CAUTION

Pay no money in advance to itinerant Directory Canvassers. We are led to mention this from the fact that certain parties have been fraudulently using our publications as specimens, and by that means collecting money in advance. Before signing an order, see that it has the name of R. L. POLK & CO. printed thereon. We ask no payment until the work is delivered, and our solicitors have strict orders not to take payment for either advertisements or subscriptions.

LAKE CITY

Population, 5,032. The judicial seat of Columbia county, is located on the S. A. L., A. C. L. and G. S. & F. Rys., 59 miles west of Jacksonville. As its name implies, the city is situated in the center of a group of lakes, which adds to the picturesque beauty. The lakes, seven in number, immediately in or around the city, abound with fish, affording pleasure and profit to the residents. The city is the seat of Columbia College, founded in 1907. It has splendid buildings and complete equipment, having a valuation of $164,000, and an enrollment of 182 students (co-educational) and offers courses in liberal arts, science, music, art, education, business and expression, leading to the degrees of A. B., B. S. and A. M. The college is surrounded by a clean, moral atmosphere and is an ideal school for the proper education of young men and women. The city has excellent high and graded schools, churches of the leading denominations, 3 banks, 3 weekly newspapers, The Free Press, Florida Index and Citizen-Reporter. Has all modern civic improvements, substantial business house and homes. Tel., W. U. Telephone connection. Exp., Sou. E. W. Irvine, postmaster.

Bard J Mack, genl store

LAKELAND

Population, 9,000. An incorporated city on the A. C. L. Ry. in Polk county, 13 miles northwest of Bartown, the judicial seat, and 208 from Jacksonville. It is one of the best known and most thriving cities in the state. Lakeland awakened but recently to a realization of her splendid geographical and topographical position (having the highest elevation of any town in south Florida), as well as to the valuable and varied resources of the county by which it is surrounded and as a consequence visitors and homeseekers have been seeking it, attracted by the altitude, water, climate, orange groves, the many beautiful lakes and other alluring inducements. Lakeland has 3 banks, which are conservative, yet thoroughly progressive; several miles of brick and asphalt streets and is about to let the contract for several miles more; also a fine system of sanitary sewerage; an efficient light and water plant, municipally owned, and which has lately been improved by the expenditure of over $100,000, making it one of the best in the state; an ornamental "white way", covering the entire business district, a modern fire-proof hotel, costing nearly $200,000; an auditorium seating 1,700; a new railroad passenger station and freight depot; a city hospital just completed; fine up-to-date business houses, carrying stocks adequate for all the needs of a town much larger; several industrial plants which with the Atlantic Coast Line Railroad shops gives employment to a large number of people and furnishes a large monthly payroll. The water supply is of the best and purest anywhere. Modern sanitary sewerage system assures the health and comfort of the people, and there is no

more healthful city in the country. Railroad facilities are easily the best in the state—thirty-two trains a day—with through coaches to New York City; churches of all denominations; good brick schools, well equipped, both physically and otherwise; climate healthy and delightful—average temperature in the warmest months being eighty-eight, and forty-eight in the coldest, with ninety-four as the highest, and thirty-four as the coldest in the history of the Weather Bureau; five newspaper, two daily and three weekly, which fact alone speaks well for the progressiveness of the community; one of the finest golf courses in the South has just been opened for play in the Lakeland Highlands, with a comfortable club house on the short of beautiful Lake Scott. Tel, Postal and W. U. Exp., Sou. Robert O. Cresap, postmaster.

MIAMI

Population, 28,000. The judicial seat of Dade county, is beautifully located on Biscayne Bay, at the mouth of the Miami river and on the F. E. C. Ry., 336 miles below Jacksonville.

Selected by Henry M. Flagler and his associates some twentyone years ago as the southern terminus of the Florida East Coast Railway. Miami has grown to be a city of more than 28,000 souls showing, during a little over a decade of remarkable growth, an increase in population from 1,200 to 28,000, which speakes volumes for the wisdom of the city's founders. The selection of a location combining attractive features sufficient to draw so large a citizenship in so short a time also has attracted many of America's foremost financiers, empire builders, manufacturers, educators, politicians, authors, philanthrophists and sportsmen. One phase of the rapid growth of Miami is shown by the fact that in October, 1915, there were 21,060 people located here, and in October, 1916, 26,000. This increase has kept steadily on until there are now over 28,000 permanent residents in Miami to which are added each winter a fixed visiting population of between 40,000 and 50,000 with a total of 100,000 visitors during the season.

One of the most important features in the upbuilding of any city is the growth of its financial institutions. From one small bank in 1896 the monetary resources of Miami today are centered in six fine institutions with a combined capital of $525,000 and deposits of over $8,000,000.

The building record of Miami has fully kept up with the increase in population and financial growth. During 1916 over $2,000,000 was spent for buildings and improvements. Miami has more reinforced concrete structures for its size than any other city in the world. The school buildings of Miami cost over one-half a million dollars.

With climate unexcelled anywhere on the mainland of the United States and located at the extreme end of the peninsula of Florida, properly in the subtropical zone and coming under the beneficent influence of the Gulf Stream, Miami has a temperature unexcelled anywhere in this country, showing a record of an average mean temperature of 74.5, a maximum temperature of 96 degrees and an absolute minimum of 29 degrees, the latter being the highest of any place on the mainland of the United States. These figures were obtained from the government weather bureau office. The record of rainfall yearly, fairly evenly distributed is 65.50 inches.

Having an aggregation of most favorable points in favor of locating winter homes here. Miami has drawn men of wealth and national, as well as international, reputation to her confines, where they have not only found pleasure and recreation but opportunity for judicious investment yielding handsome

returns. These men have built homes best suited to their taste, convenience and comfort.

Affording the most favorable motoring conditions found in all the northern hemisphere, it is but natural that Miami should be the mecca of motorists who drive through from all parts of the United States. These travelers find motoring conditions perfect on some 600 miles of rock surfaced, oil coated roads which radiate in all directions from Miami and form the terminus of more national roadways, including the famous Dixie Highway, than any other city in the world.

The most congenial climatic conditions to be found on the western continent are conducive to the finest yachting and boating seasons imaginable. Annually there come to these kindly shores palatial private yachts, houseboats and speediest motorboats in the world.

Many famous catches are recorded in the annals of Miami's fishing fraternity and winter angling enthusiasts. The mighty traveler looking for interesting and exciting pastime will find foemen worthy his rod and reel in the wary tarpon that frequent the waters of Biscayne Bay, while the kingfish, barracuda and other gamey denizens of the deep afford many an hours diversion of a more or less exciting nature.

There is much interest in aeroplaning the country over, and there have been bids from many places for the establishing of aeroplane schools. Air and all other conditions being so favorable in Miami the government has decided to establish a naval training school for aviators here on which $500,000 is being spent and at which there will be 500 students in attendance during the winter season of 1917-1918. Some 75 seagoing aeroplanes will be used in instructing these young men in the art of aerial warfare. The men trained here will be sent to the front as rapidly as they are prepared for service.

Hotel accommodations in Miami include the finest hostelries on the Atlantic coast and consist of many first-class houses, from the great and hospitable establishment of the Florida East Coast Hotel Company and kindred places of entertainment to the modest bungalow with housekeeping accommodations that may be had by the year or by the month either furnished or unfurnished.

A splendid public library with a free reading room is maintained, with some assistance from the city, by the womans' club, one of the most activable organizations in the South.

The agricultural resources of Dade county, of which Miami is the county seat, are enormous. There are some 770,000 acres of extremely fertile soil contiguous to Miami of which there are but 15,000 acres under cultivation according to afficial agricultural reports in 1916. It is readily seen that a beginning has scarcely been made in drawing upon this empire of fertility, which when once worked to capacity will make Miami the center of the greatest and richest producing area in all the South. Much of this land is early vegetable land, capable of intensive cultivation and yielding great crops of winter vegetables at highly remunerative profits to the farmers of this section.

Stock raising hereabout has been demonstrated conclusively to be one of the most attractive industries of which any rural section is capable, affording the most alluring profits imaginable. This is particularly true of dairy farming with results being practically worked out near Miami. Tel., W. U. Exp., Southern. Francis M. Brown, postmaster.

MONTVERDE

Population, 350 A small village located in Lake county on the T. & G. R. R., 17 miles south of Tavares, the seat of justice, 30 from Leesburg, 40 from Sanford, 8 from Oakland, the banking town, and 165 from Jacksonville. It is on the west shore of Lake Apopka, the second largest lake in the state, a beautiful body of water 30 miles long and 12 miles wide. Many other lakes dot the country about the village, which not only beautify it but afford fishing, rowing and bathing. The village is the seat of Monteverde Industrial School, a coeducational institution, and has Baptist and Methodist churches, grist and feed mills. Telephone connection. Exp., Sou. Alidel M. Lowry postmaster.

ORLANDO

Population 8,000. The judicial seat of Orange county, a county of a thousand lakes, is a prosperous and delightful city and a famous tourist resort, located on the S. A. L. and A. C. L. R. Rs., 91 miles northeast of Tampa and 148 south of Jacksonville. Orlando is a most progressive city. It not only holds a place high in the list of popular tourist resorts, but also lays claim to being the center of the citrus industry of the state and in addition is the center of a very fertile, general farming and trucking country. The city is very attractive in appearance. It is a clean city. It is as wooded as the forest of Arden. One almost expects to find Orlando's carvings on the trunks of the mighty live oaks, and can easily imagine that they can hear the love-lorn Rosalind exclaim: "I'll tell thee, Aliena cannot be out of sight of Orlando." It is a city of homes. It is a place of beauty, with its palms, its roses and other flowers, and in midwinter it is ablaze with poinsettias. It is on the central ridge of the state. Two great lake systems originate within its limits, one flowing east into the St. Johns river and the other west into the Gulf of Mexico. It is a modern city with splendidly paved streets and sidewalks, electric lights, gas, a complete system of sewage and of pure water. The streets extend from the business center into the residence sections, past well-kept parks, beautiful lakes, orange groves, rose gardens, truck gardens, patches of bananas, wonderful palms and nearly all the way beneath the shade of mighty oaks, interspersed with camphor, maple and eucalyptus trees. There are 4 banks—one national and three state—all strong institutions, many modern hotels, golf and country clubs, educational facilities of a high order; in addition to the excellent high and graded schools, there are several other educational units, notably the Cathedral School for Girls, St. Joseph's Academy and Rollin's College, the latter 5 miles distant; 2 large department stores and a large number of special stores, 2 daily newspapers, the Evening Reporter-Star and the Morning Sentinel, and a weekly, the Orange County Citizen, electric light, gas and ice plants, 7 large packing houses, planing mills, cigar manufactories, novelty works, crate manufactories, foundry and machine shop and numerous other industries. The city government is of the model commission form. There is a Board of Trade, with a large and active membership, rightly using the title "The Power House of Progress." Tels., W. U. and Postal. Telephone connection. Exp., Sou. W. C. McLean, postmaster.

PALM BEACH

Population 350. One of the best known winter resorts in the State, is located on Lake Worth, a lagoon some 22 miles in length and averaging about a mile in width, and on the Atlantic Ocean, 300 miles below Jacksonville, 65 above Miami, and across the lake from West Palm Beach, its railroad station, county seat and banking point. Palm Beach has four hotels, one of which, "The Royal Poinciana," is the largest winter tourist hotel in the world. Here are other fine hotels, the "Breakers," and beautifully located amid orange and cocoanut groves is the large hotel "Palm Beach." Another hotel is the "Hibiscus." These hotels face on the ocean and on Lake Worth, the latter being a beautiful body of water 18 miles long by a maximum width of 1 mile. The Gulf Stream touches the shore here and insures the bathing and climate for which the resort is so much noted. This is a fine fishing ground, the catches of kingfish made are something wonderful, and many other species are abundant. Visitors to Palm Beach usually take a trip to Munyon's Island, which is practically 18 miles of garden, citrus groves and palm plantations, maintained in a state of perfection. Mrs. Eleanor R McKenna, postmaster.

PENSACOLA

Population 31,945 (including suburbs), The judicial seat of Escambia county, is a prosperous incorporated city, located on Pensacola Bay, 10 mlies from the Gulf of Mexico, and on the L. & N. and P. M. & N. O. R. Rs., 365 miles from Jacksonville and 50 from Mobile. Pensacola is one of the oldest cities in the United States. Its history dates back to the discovery of Pensacola Bay by the Spanish explorer, Panfilo de Narvaez, in 1528, just thirty-two years after the discovery of America by Columbus. In 1559 a city was built on the shores of Pensacola Bay by Don Tristram de Luna. This was the first settlement within the limits of the continental United States and antedated the settlement of St. Augustine by four years. In 1699 a French expedition, under Iberville, took possession of the country west of the Perdido river and in 1702 founded a French colony at Mobile. The French and Spanish were then rivals for the control of the Empire of North America, and inasmuch as Pensacola was on the frontier of the Spanish possessions, there was war and constant fighting between the Spanish and French forces. Pensacola was captured and recaptured many times. In fact, the little village scarcely enjoyed as much as five years of continuous peace from the time of its first settlement to the close of the Civil War of 1861-1865. There are many historical spots in and around Pensacola. Just west of what is now Lee Square is the site of Fort George, the scene of desperate struggles. To the north of it was built Fort San Bernado, where General Jackson planted his guns for the bombardment of Fort George. At the present army post, Fort San Carlos, built by the Spanish in 1696, may still be seen.

About the year 1910 the real development of the city began, park systems were installed, streets were paved, modern systems of street lighting were adopted, large office buildings constructed and one of the most beautiful and up-to-date hotels in the South completed.

Pensacola is a port of entry, with an excellent harbor and large commerce. Lumber is shipped very extensively, also fish, hides, tallow, wool, iron, cotton and naval stores. Fertilizer factory, cotton compresses, saw and planing mills and fishing interests are important industries. At Warrington, 7 miles seaward, is the Pensacola Navy Yard. Pensacola has 2 daily newspapers, the News and Journal, and the latter is also published weekly. Banking facilities are afforded by 3 strong banks. Tel., W. U. Exp., Sou.

JACKSONVILLE FLORIDA

FOR ANYTHING IN LAND SEE
W. H. D. STEWART
ARTHUR HOLLOPETER, Associate
Real Estate and Investments
222 Eleventh MIAMI

Taylor County leads in the production of Lumber, Naval Stores, Agricultural Products and Stock Raising. Superior educational facilities. A region of good health and natural beauty. Perry, the county seat, is a town of thrift and enterprise. Gained three hundred per cent. in population since 1910. Our health-building mineral waters are far-famed.

THE TAYLOR COUNTY BOARD OF TRADE

An organization supporting everything that's good for Taylor County in particular and Florida in general. OFFICERS—E. L. Williams, President; P. F. Bloodworth, Vice-President; Fred G. Warde, Secretary; T. W. Stackhouse, Treasurer. EXECUTIVE STAFF—J. H. Scales, S. H. Peacock, Jr., T. N. Jones, J. H. Loughridge, C. A. O'Quinn. PERRY, FLA.

QUINCY

Population, 3,500. The judicial seat of Gadsden county, is one of the oldest towns in Florida, lying 189 miles west of Jacksonville on the main line of the S. A. L. Ry., it is easy of approach by this railroad from the east or west or from the north and south by the G. F. & A. R. R. Being located on the Old Spanish Trail Highway, with good roads coming in from all other directions, approach by automobile is a pleasure to the tourist. Quincy is 24 miles west of Tallahassee. It is located in the heart of the tobacco belt, in one of the few best agricultural counties of Florida. The tobacco grown here is used for wrappers and binders on cigars and the quality is equaled only in the United States by the tobacco grown in the state of Connecticut. It has been estimated by those best informed that the 1917 crop brought the growers in the neighborhood of $2,000,000. The tobacco grown here is packed and prepared for the markets by the several large packers. One company alone has thirteen large packing plants in Quincy.

The soil in Gadsden county is a rich sandy loam and produces in abundance any crop adapted to Florida. Corn, sweet potatoes, peanuts, velvet beans, rye, oats, sugar cane, some alfalfa and various other staple crops flourish in this splendid and fertile county. The contour of the land is gently rolling; enough so to break the monotony and afford good drainage. There is very little of the low, flat, sandy land such as may be found in the southern part of Florida. The public highways in Gadsden county are far above the average, though no bonds have ever been issued for road building purposes. But the commissioners are making rapid strides in road building and have recently bought large road machines in order to carry on the construction of roads at a more rapid rate of speed. Quincy is known far and wide for its intellectuality and hospitality. A splendid high school, giving a nine months' course, is maintained and interest in education is manifest in a marked degree. The religious faiths are represented by the Methodist, Presbyterian Episcopal, Baptist and Catholic churches. The Methodist congregation

JACKSONVILLE - - - FLORIDA

is now having erected a thirty thousand dollar church and the Presbyterian and Baptist churches expect to build new edifices in the near future. The city has electric lights and an excellent water system. Banking facilities are afforded by 2 strong banks. Recently an election was carried to bond the city for eighteen thousand dollars for street paving purposes. Added to this, the two-thirds to be paid for by property owners will give Quincy twelve paved blocks at a cost of $54,000. A weekly newspaper, the Gadsden County Times, is published. A wide-awake organization, known as the Quincy Boosters' Club, will be glad to give any information desired by any one in regard to Quincy and Gadsden county. Tel., W. U. Exp., Sou.

ST. AUGUSTINE

Population, 6,200. The judicial seat of St. Johns county is beautifully located on Matanzas Sound, one mile from the Atlantic Ocean, and on the F. E. C. Ry., 36 miles southeast of Jacksonville. The climate is charming, and it is a favorite winter resort, attracting people from all parts of the Union in search of health and pleasure, while the group of modern hotels here are such that their fame is world wide. There are hotels of all grades to suit purse and inclination. Some of these would grace the capital of any European country or fitly house its sovereign, and are unsurpassed in the world for beauty and lavish splendor. These great hotels have much to offer in the way of social functions. There are always golf and tennis, boating and bathing, sailing and fishing, and always the blue sky and soft air to make a spin on the hard shell roads more enjoyable. St. Augustine was settled in 1565 by Don Pedro Menendez de Avilles. It was then a well fortified post, a suitable defense both against Indians and buccaneers. Of the system of fortifications little now is left, but the pillars of the old gateway are still standing, the sea wall remains, a few of the quaint streets have not yet been improved, and the fort is always an object of interest. Fort Marion has been

built and rebuilt, always keeping the original foundations. It stands at the north end of the sea wall, where the Spaniards built it in the days of Spain's supremacy; it was then called Fort San Marcos. St. Augustine has all the appointments and facilities of a modern, up-to-date city, being supplied with electric lights, water works, fire department, opera house, churches of the leading denominations, a fine public school system, The Florida School for the Deaf and Blind, local and long distance telephone facilities, public library, hospitals, handsome and commodious general and special stores, 3 banks, a newspaper, The Record, published daily, and 2 weekly papers, the Record and Meteor. Tel., W. U. Exp., Sou. Charles F. Hopkins, postmaster.

ST CLOUD

Population, 3,000. An incorporated city in Osceola county, 9 miles east of Kissimmee, the county seat, and on a branch of the A. C. L. Ry., has all civic improvements, churches of the leading denominations, excellent schools, a bank and a weekly newspaper, The Tribune. The town was settled in 1905 by members of the G. A. R. who found in the delightful climate an enjoyable place to spend their declining years. The town is being rapidly settled with business men, also fruit growers and truck farmers, the soil of the surrounding country being highly adapted to cultivation of those products which are shipped to northern markets. The town is surrounded by a chain of lakes abounding in fish. There are 2 hotels and a theatre, a planing mill and the Board of Trade serves to advance the interests of the community. Hourly bus connection with Kissimmee. Tel., W. U. Telephone connection. Exp., Sou.

ST NICHOLAS

A discontinued postoffice in Duval county. Rural delivery from South Jacksonville.

Davis Henderson, grocer
Dent Charles B, genl store
Holsonback Wm L, grocer

ST PETERSBURG

Population, 15,000. Is situated on the southermost point of Pinellas Peninsula, Pinellas county, 270 miles south from Jacksonville. The city lies on a gentle slope rising to 40 feet on Tampa bay and extends backward in the form and a parallelogram. Recently the city has annexed a strip of land one mile wide extending westward five miles. Through the originally planned city and this "handle," Central avenue, which divides the city north and south, seeps west from Tampa Bay, a magnificent boulevard seven miles long, straight as an arrow to Boca Ceiga Bay on the west. The city has a climate that is ideal both winter and summer, making it very attractive to tourists. This is a great fruit growing region, mangoes and avocade pears, guavas and papayas or "paw-paws," and bananas and pineapples mingle with the common citrus fruit trees, such as orange, grapefruit, lime and lemon. Tall palms grow here and add to the beauty of the tropical scenery. The commission form of government was adopted in 1913. The civic departments are well organized and efficient. Public utilities are city-owned. There are 4 banks, all with handsome brick or stone buildings; the business blocks are modern and imposing. Among the industries are 2 ice and cold storage plants, machine shops, marine ways, fruit, vegetables and fish packing houses, wholesale grocery, grain and fertilizers, cement and concrete plants, tobacco factory and shops of all description. The city is splendidly equipped for entertaining, the numerous and excellent hotels, apartment houses and cottages furnish adequate accommodations. Besides the public schools, there are a number of private schools, business college and girls' seminary. St. Petersburg is the southern terminal of the A. C. L. Ry. and connects with their line and the S. A. L. at Tampa by a line of steamers plying on Tampa Bay. The T. & G. C. Ry., has a line from Tampa to St. Petersburg. The Board of Trade, composed of progressive citizens, is active in the upbuilding of the city. Tel., W. U. Exp., Sou. Wm. L. Straub, postmaster.

THE

BUYERS' GUIDE

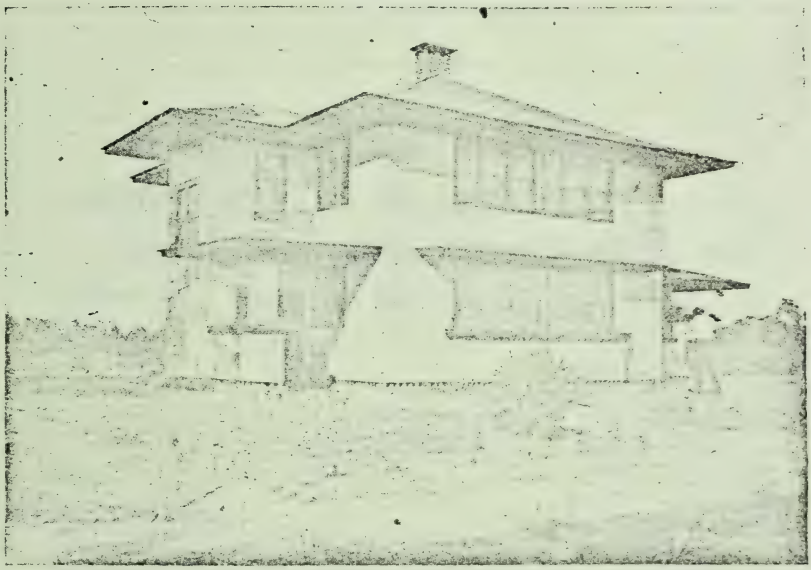
1918

Money to loan on First Mortgage at 8 per cent.

I can place $50,000.00 on first mortgage at 8 per cent.

Bayou Bonita

On the shores of Big and Little Bayous—a yachtman's paradise. A Central Haven off Tampa Bay affording perfect anchorage, bathing, fishing, sailing, motor boating and oyster beds. Here you will find one of the most perfect developments ever undertaken in Florida, including concrete sea walls, sidewalks, curbing, sanitary sewerage, disposal plant with sewer mains to every lot.



Salt water from a central plant is pumped and delivered to every home through special mains laid for the purpose. Also soft fresh water; streets are paved with a noiseless material; electricity at 4c per kilowatt makes cooking a pleasure. Telephones, electricity, trolley to the property, 5c fare. Being just outside the city limits makes a low tax rate. Parking is being done under the supervision of a skilled landscape artist. Tennis and roque courts at convenient points.

My motor cars at your call.

Directory Libraries

¶ Every Polk office has a library of directories of various cities. These are maintained for the convenience of our patrons, and they are constantly supplying information of many different kinds to people who come to use them.

¶ City Directories are City Catalogs. They contain a list of everybody and everything within a city. Many of the more progressive concerns buy directories of various cities as they are issued for mailing list purposes.

TALLAHASSEE

Tallahassee, the "Hill City of Florida," is the capital of the state; it is also the county seat of Leon county and is situated almost midway between Jacksonville and Pensacola, in North Florida. It is on the main line of the S. A. L. Ry., and the G. F. & A. R. R. Maurice Thompson, the well known author, describes the county of Leon as "beautiful rolling forest and field alternating; a genuinely Piedmontese landscape, the like of which can not be found elsewhere in America." The Dixie Highway and the Old Spanish Trail Highway meet at Tallahassee, and numerous fine hard clay roads invite the motorist to explore this rich and picturesque agricultural country. Around Tallahassee is the finest large game hunting in the state and both fresh and salt water fishing can be enjoyed nearby. Tallahassee's school

CHEVELIER
Will be located 66 miles due West of Miami.
For information and particulars write or see
J. F. JAUDON *Miami*

The Great Cross State Hard Surface Highway
THE TAMIAMI TRAIL
Will put CHEVELIER on the map as did the F. E. C. R. R. make Miami possible.

system has long been famous, and the million-dollar Florida State College for Women is taxed to the limit of its capacity, many pupils coming from distant points, this year. There are no saloons in the capital city and the social life is superior. The city has paved streets and owns electric light, water and gas plants. Has 5 strong banks, many substantial mercantile houses and important industries, 3 newspapers are published, the Democrat, daily and weekly, and the Florida Record, weekly. The Hill City Golf Club provides entertainment for lovers of the game. The course was planned by H. H. Barker, one of the foremost golf course constructors in this country, who for several years was with the famous Garden City Club of New York; it has every variety of play, with three water hazards, and is the nearest to "real Massachusetts golf" in Florida. The course is laid out among beautiful hills and valleys and the fairways bordered with immense live oaks festooned with Spanish moss, present most charming and picturesque scenery. The many fine lakes and running streams amid the rolling fields furnish ideal conditions for fine stock and dairy farms. Western cattle men are becoming interested in Florida, and several Leon county ranches have recently changed hands. The S. A. L. Ry. has just built refrigerator cars to transport all the milk that can be shipped from Tallahassee; this will stimulate the buying of more dairy herds. The winter climate is like the glorious Indian summer of the North, the summer nights are cool and refreshing. The average crop growing season is 330 days. The quaint Capitol, the Governor's Mansion, the former home of Prince Louis Napoleon Achilles Murat, son of the King of Naples, the tombs of the Prince and Princess Murat, the wonderful springs and the famous Wakulla spring near Tallahassee, will repay a visit to these points of interest. The Tallahassee Boosters' Club is a live organization carefully fostering the interests of the city. The future of this section will be limited only by the efforts put forth by its people. Nature has done her best for Tallahassee and Leon county. Tel., W. U. Telephone connection. Exp., Sou. George I. Davis, postmaster.

Florida State College for Women

TALLAHASSEE, FLORIDA

The Florida State College for Women has the unique distinction of being the only standard college in America established and supported by a state for the higher education of women. In equipment and character of work done, it is gradually taking rank with the great endowed colleges for women. In the reports of the United States Commissioner of Education, it is classed with the comparatively small number of standard colleges and universities in the South.

TAMPA

Population (including West Tampa, practically a portion of the city, and suburb), 74,126. Is the judicial seat of Hillsborough county and the Metropolis of the ten or twelve counties generally known as South Florida and is located at the head of Hillsborough Bay, midway on the Gulf coast between the Peninsula of Florida and Apalachee Bay, on the A. C. L., S. A. L., T. N. and C. H. & N. R. Rs., 1213 miles from New York, 1,020 from Baltimore, 886 from Richmond, 756 from New Orleans, 516 from Atlanta and 212 from Jacksonville. Water transportation is furnished by the following steamship lines: Mallory S. S. Co., Gulf &Southern S. S. Co., South S. S. Co., Peninsula and Occidental S. S. Co., Towles S. S. Line and St. Petersburg S. S. Co. Besides the various lines by sea and rail as outlined above, there are a score of other lines, steamers and sail, carrying cargo in and out of Tampa. In the trade between Tampa and South America there is a fleet of schooners operating on the average of 2 or 3 sailings each week. The water commerce of Tampa is valued at an average of $35,000,000 annually, the port being the 7th in customs collections in the United States. The city is surrounded by a country which is very rich in resources. The lands adjacent are now among the most productive and valuable in the country, in view of the intelligent cultivation, which of late years has been introduced by incoming settlers and aided, of course, by the magnificent climate and general warmth, which practically may be said to prevail throughout the entire year. The city is famed as the center of the citrus fruit culture and winter gardening. The climate of Tampa leaves but little to be desired. The equability of temptrature and the freedom from excessive heat and cold shows the adaptability of the locality for the successful carrying on of all branches of industry. The winter is marked by abundant sunshine and warmth, the summer by rainfall and coolness. The average mean temperature for January, the coldest month of the year, is about 67 degrees. The warmest months, July and August, show an average temperature of 81 degrees. The highest temperature on record is 95 degrees, and an average warm day in summer at noon would show a thermometer mark of about 85 to 88. The average rainfall during the past dozen years has been about 40.02 inches, more than three-fourths of this falls during the summer months, which are generally designated as the rainy season. The city and locality are particularly free from tornadoes, blizzards, water spouts, earthquakes and other disasters which so often devastate other sections. Also, in the hottest season of the year at eventide of each day, come land and Gulf breezes, which induce sleep and invigorate humanity. Tampa, altogether, is one of the healthiest and most delightful residential cities in the South. The sandy soil induces natural drainage, and in addition, the city authorities are improving the sanitary arrangements of the city as fast as is possible.

The various religious denominations represented are as follows: Adventist, Baptist, Congregation, Episcopal, Jewish, Lutheran, Methodist, Presbyterian, United Brethren and Roman Catholic. The negroes have also a large number of churches. There are in operation a high school, grammer and primary schools. The above are the public

schools for white pupils. For the colored race there are a number of primary and graded schools. Irrespective of public schools there are private preparatory schools imparting tuition from the primary up to the Academic grade. The Catholics also maintain a college for boys and young men, and a convent school for young ladies, and in addition, they have also several mission schools among the negroes. There is also a business college. The banks of this city while at the same time exercising very properly a reasonable conservatism, have never been lacking in enlightened enterprise, or that safe and careful kind of public spirit that always stands ready to extend proper assistance to public and private movements based upon correct principles for the development of resources, the upbuilding of legitimate business ventures and the establishment of manufactures and commerce.

There are 10 banks, including those at West Tampa and Ybor City, with capital and surplus of $3,760,705.07.

For a period of about 25 years the name of Tampa has been identified with the manufacture of the finest clear Havana cigars, and in 1916 records were shattered, and Tampa still maintains the lead with even a greater margin than ever before as the largest clear Havana cigar manufacturing city in the world. During the year 1916 a total of 313,455,790 cigars were manufactured, and a tax on this paid to the Federal Government. This was the first time in the history of the industry when more than 300,000,000 cigars were made, an average of more than 1,000,000 cigars for every working day in the year—"Tampa, without a chimney, makes the whole world smoke."

The perfect climate for this line of manufacturing makes Tampa the most ideally situated location in the country for this industry, and the demands on the local manufacturers are growing heavier year by year. This industry alone paid through the Internal Revenue office to the Government more than $1,000,000 during 1916.

More of these high grade smokes are made in Tampa than in any other one city in the world, and more than are made in Key West and the Island of Cuba combined.

All things have a beginning, and Tampa's wholesale business began in a very modest way in 1886. For the next ten years the wholesale business of the city was conducted by one firm; from that time on additional establishments have entered the field, and from a few thousand dollars of business annually, up to 1890, the business has grown until now the conservative estimate of the wholesale grocery line alone is about $30,000,000 per year, and the investments in the wholesale and jobbing business has increased until there is now about $15,000,000 invested. There are about fifty firms in the wholesale and jobbing business in Tampa, most of whom have traveling salesmen going into what is known as Tampa's Territory, extending 100 miles north and bounded on the east, south and west by the Atlantic, the Straits of Florida and the Gulf of Mexico respectively. This territory is ascertained very easily by computing freight rates, and in the territory as outlined above Tampa can sell cheaper than any other jobbing center. This is made possible by the excellent rail and water transportation facilities of this port. The Board of Trade has been instrumental in several instances in having freight rates reduced, which has increased our jobbing business.

The future of this business in Tampa can only be determined by the progress of this territory in population and development, and with the enormous amount of undeveloped agricultural lands, which are fast becoming settled, it is only a matter of a short time until Tampa's wholesale, jobbing and manufacturing business will be double what it is today, and with the additional

transportation facilities which are rapidly being shaped up, there will be added inducements for more establishments to be started.

Tampa is well represented in manufacturing lines, and the story can best be told by giving herewith a list of Made-in-Tampa products

Cigars, coffee furniture, candies, insecticides, mattresses, chemicals, boxes, cuts and engravings, fertilizer, signs, crackers, bags, pictures, pre serves, soft drinks, brushes, stone work, beer, paints, brooms, books, macaroni, soap, barrels steel ships, wooden vessels, tobacco, "movies", awnings, coffins, printing, vinegar, automobile equipment rubber stamps, medicines, wagons and farm imple ments, electrical goods, machinery, plumbing, brass goods, building materials—covering a wide range—bread, ice cream, ice, dairy products, meats, hams and bacon, paving materials and drain pipes.

Tampa's growth in 1916 shown in figures: internal revenue, $1,011,988; customs receipts, $1,887,946; tobacco imports, 50,000 bales; post office receipts, $242,128; cigars shipped, 312,-456,376; tons of phosphate shipped, 380,480; building permits, $1,288,633; tonnage by water, $1,348,420; value of same $37,576,358; bank clearings, $51,-322,056.31; tons of fish and oysters shipped, 1,165; fire loss, $196,873.43; births, 1,267; deathes, 657; area of city, 8.6 square miles; street mileage, 174.71 miles; assessed valuation, $31,016,590; tax rate, 21 mills; miles of sidewalks, 175.

Between the dates of September 5, 1916, and January 15, 1917, 2,118 cars of grapefruit, totaling 741,600 crates, 10028 cars of oranges, totaling 3,509,-800 crates, and 1,293 cars of truck, including lettus, tomatoes, celery, strawberries and other crated vegetables, totaling 518,000 crates, were the reported movement of carload shipments from the State of Florida. This shows a total of 4,251,400 cases of citrus fruits and a total of 4,769,400 cases of citrus fruit and truck shipped from Florida points in carload lots to other states in four months; with less than carload lot shipments a total of more than 5,000,000 crates were handled in this time.

The Florida Citrus Exchange, with headquarters in Tampa, is the citrus growers' co-operative organization, and Tampa is the center of the citrus fruit territory.

Cities that can not boast of upbuilding publications of a high character are lacking in one of the most essential assets, for public opinion from the outside is moulded to a great extent by the class of publication issued in a community. There is no city of Tampa's size in the country that has better daily publications than the Tampa Morning Tribune and the Tampa Daily Times. Besides these two dailies there is an agricultural weekly, the Florida Grower, and also the Free Press, a weekly newspaper, and several other papers with a smaller circulation. There are several Spanish publications, and the Board of Trade issues every month the Tampa Truisms, a four-page paper.

The Tampa Board of Trade is a live organization which carefully and energetically fosters the interests of the city in all matters of civic improvement and commercial activities. Tampa has modern electric light, gas, water and ice plants, execellent hotels, theatres, libraries, local telephone company, efficient fire and police departments, social and golf clubs, parks and playgrounds, hospitals, interurban lines to important sections, imposing mercantile buildings and stately residences.

The climate of Tampa, together with its numerous other attractions for tourists, such as hunting, fishing, sailing, bathing, riding, driving, etc., has made the city and its vicinity very popular as a winter resort. Tel., Postal and W. U. Telephone connection. Exp., Sou. James McKay, postmaster.
